Introduction

- Our Topic,

Welcome To the Future

❖ Student 01 – Chamidu Shilakshitha

- Task – 01 - Presentation Page
- Task – 04 - Buy Prioducts Page

❖ Student 02 – Navidu Chrishen

- Task – 02 - Main Page
- Task – 03 - Query Form Page
- Task – 9a - External CSS

❖ Student 03 – Lahiru Dilshan

- Task – 06 - Quiz Page
- Task – 08 - About Page

❖ Student 04 – Isuru Udula

- Task – 05 - Diagram (SVG)
- Task – 07 - Thumbnails Images

❖ All students,

- Task – 9b - External CSS
- Task – 10 - Page Editor
- Task – 11 - Logo/Page Editor
- Task – 12 - Anchors
- Task – 13 - Additional Interactivity

- ❖ Our web course work was based on "Science". On behalf of that we chose "Crypto currency" as the topic which is most current trends in field of computer science. It's a very professional web site. We successfully completed the site as a great team.

Technical Discussion

Quiz page.HTML

```
1 let valueArray1= getRadioValue(myRef.q1);
2
3 if (valueArray1=="Dogecoin"){
4     total=total+2;
5     var mydiv=document.getElementById("q133");
6     mydiv.innerHTML="<span style=\"color:#008000\"><strong>Dogecoin-
</strong><i>your answer is correct</i></span>";
7 }
8 else if (valueArray1=="Ether"){
9     total=total-1;
10    var mydiv1=document.getElementById("q133");
11    mydiv1.innerHTML="<span style=\"color:#008000\"><strong>Dogecoin-
</strong><i>the correct answer</i></span>";
12    var mydiv2=document.getElementById("q111");
13    mydiv2.innerHTML="<span style=\"color:#A41623\"><strong>Ether-
</strong><i>your answer is incorrect</i></span>";
14 }
15 else if (valueArray1=="Tether"){
16     total=total-1;
17     var mydiv1=document.getElementById("q133");
18     mydiv1.innerHTML="<span style=\"color:#008000\"><strong>Dogecoin-
</strong><i>the correct answer</i></span>";
19     var mydiv2=document.getElementById("q122");
20     mydiv2.innerHTML="<span style=\"color:#A41623\"><strong>Tether-
</strong><i>your answer is incorrect</i></span>";
21 }
22 else if (valueArray1=="Cardano"){
23     total=total-1;
24     var mydiv1=document.getElementById("q133");
25     mydiv1.innerHTML="<span style=\"color:#008000\"><strong>Dogecoin-
</strong><i>the correct answer</i></span>";
26     var mydiv2=document.getElementById("q144");
27     mydiv2.innerHTML="<span style=\"color:#A41623\"><strong>Cardano-
</strong><i>your answer is incorrect</i></span>";
28 }
29 else if (valueArray1==""){
30     total=total;
31     var mydiv=document.getElementById("q133");
32     mydiv.innerHTML="<span style=\"color:#008000\"><strong>Dogecoin-
</strong><i>the correct answer</i></span>";
33
34 }
```

I used the above JavaScript validation check if the answer is correct. I store the checked value to a variable using **getRadioValue** and if the answer is correct the color of it changes to green color and display “-**your answer is correct** “ and if the answer is incorrect it will change the color of checked answer to red and display-“**your answer is incorrect** “ and also change the color of the correct answer to green stating “**correct answer**” in front of it.

```
1 function myTimer() {
2     document.getElementById('timer').innerHTML = sec + "sec left";
3     sec--;
4     if (sec == -1) {
5         clearInterval(time);
6         getTheValues(quiz);
7         document.getElementById('sub').style.display="none";
8     }
9 }
```

This is the process where the value of the radio button is taking

```
1 <form name="quiz">
2     <ol type="1">
3         <li>Which of these cryptocurrencies is the oldest?</li>
4
5         <input type="radio" id="q11" name="q1" value="Ether">
6         <label id="q111">Ether</label><br>
7         <input type="radio" id="q12" name="q1" value="Tether">
8         <label id="q122">Tether</label><br>
9         <input type="radio" id="q13" name="q1" value="Dogecoin">
10        <label id="q133">Dogecoin</label><br>
11        <input type="radio" id="q14" name="q1" value="Cardano">
12        <label id="q144">Cardano</label>
13
14
15        <li>After Bitcoin, Ether and Tether, which are the biggest crypto coins?</li>
16
17        <input type="radio" id="q21" name="q2" value="Solana">
18        <label id="q211">Solana</label><br>
19        <input type="radio" id="q22" name="q2" value="Binance">
20        <label id="q222">Binance coin</label><br>
21        <input type="radio" id="q23" name="q2" value="Cardano">
22        <label id="q233">Cardano</label><br>
23        <input type="radio" id="q24" name="q2" value="Dogecoin">
24        <label id="q244">Dogecoin</label>
25
26
27        <li>Why is buying Tether an integral step to acquiring Bitcoin in China?</li>
28
29        <input type="radio" id="q31" name="q3" value="It makes buying bitcoin cheaper">
30        <label id="q311">It makes buying bitcoin cheaper </label><br>
31        <input type="radio" id="q32" name="q3" value="Bitcion exchanges only accept only USD dominated payments">
32        <label id="q322">Bitcion exchanges only accept only USD dominated payments</label><br>
33        <input type="radio" id="q33" name="q3" value="Buying Bitcoins directly in china is banded">
34        <label id="q333">Buying Bitcoins directly in china is banded </label><br>
35        <input type="radio" id="q34" name="q3" value="It allows access to services like Alipay">
36        <label id="q344">It allows access to services like Alipay </label>
37
38        <li>What is a CBDC?</li>
39
40        <input type="radio" id="q41" name="q4" value="A way encoding tion on a blaockchain">
41        <label id="q411">A way encoding tion on a blaockchain </label><br>
```

The above HTML code shows how I code the questions and answers with **radio buttons**. I wanted to make the quiz **scrollable** because it easy to user to jump to previous questions and change the answers of them.

The screenshot shows a quiz interface with a header bar containing a logo 'Crypto E2' and navigation links: 'Buy coins', 'Learn', 'Help', 'About us', 'Scheme', and a 'Sign-up' button. Below the header, a timer shows '44sec left'. The quiz contains two questions:

1. Which of these cryptocurrencies is the oldest?
 - ☐ Ether
 - ☐ Tether
 - ☐ Dogecoin
 - ☐ Cardano
2. After Bitcoin, Ether and Tether, which are the biggest crypto coins?
 - ☐ Solana
 - ☐ Binance coin
 - ☐ Cardano
 - ☐ Dogecoin

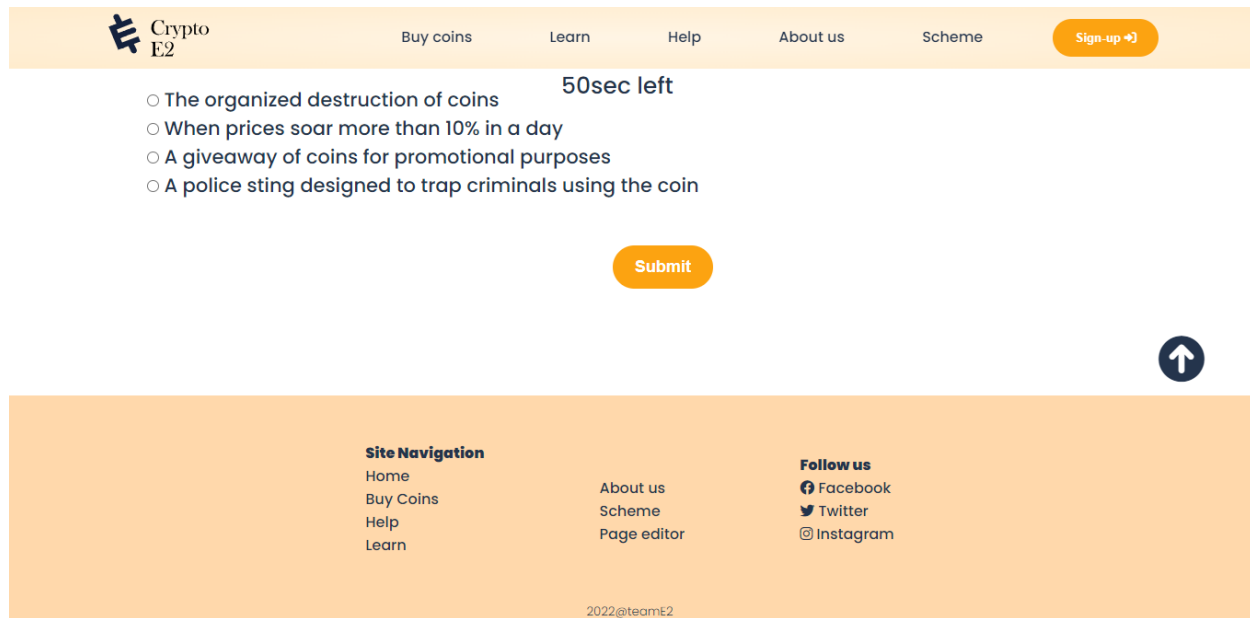

This is how the answers display in the screen when the code runs

The screenshot shows the same quiz interface, but with feedback for the first two questions. The timer now shows '51sec left'.

1. Which of these cryptocurrencies is the oldest?
 - ☐ Ether
 - ☒ ~~Tether~~—your answer is incorrect
 - ☐ ~~Dogecoin~~—the correct answer
 - ☐ Cardano
2. After Bitcoin, Ether and Tether, which are the biggest crypto coins?
 - ☒ ~~Solana~~—your answer is correct
 - ☐ Binance coin
 - ☐ Cardano
 - ☐ Dogecoin

3. Why is buying Tether an integral step to acquiring Bitcoin in China?

As described, when the user enters the wrong answer and the correct answer the above changes occur in the relative elements. So when the user submit his/her answers or when the time limit exceed the above changes will appear so the user can identify the mistakes and the correct answers after the submission.

```

1      <div class="submit-btn">
2          <center>
3              <input id="sub" type="button" value="Submit"
onclick="getTheValues (this.form)">
4          </center>

```

This is the code of the submit button that finalize the quiz and provide the answers to the user.

```

1 <div id="currentTime" class="timer" style="color: white;" class="d-flex
justify-content-end time">

```

This is the space of the timer in the HTML Page. Since I was making a scrollable quiz in wanted put the timer in the top of the page and make it sticky using CSS.

```

1 var sec = 60;
2 var time = setInterval(myTimer, 1000);
3
4 function myTimer() {
5     document.getElementById('timer').innerHTML = sec + "sec left";
6     sec--;
7     if (sec == -1) {
8         clearInterval(time);
9         getTheValues(quiz);
10        document.getElementById('sub').style.display="none";
11    }
12 }

```

This the function that I created to make a timer in the web page. The timer counts 60 seconds

```

1 function getTheValues (myRef) {

```

When the user click on the submit button or when timer run out the above main function will execute.

For every correct answer, every wrong answer, and null response a score will be calculated. Correct answers= 2marks, wrong answer=-1 and null answers(no radio button was clicked)=0 So according to the final total, the page will change. That was coded as below;

```

1 if (total>=12 && total<=20){
2 document.querySelector("body").style.backgroundColor="#40F99B";}
3 if(total>=8 && total<12){
4 document.querySelector("body").style.backgroundColor="#F0F757";}
5 if(total<5){
6 document.querySelector("body").style.backgroundColor="#FF4949";}

```

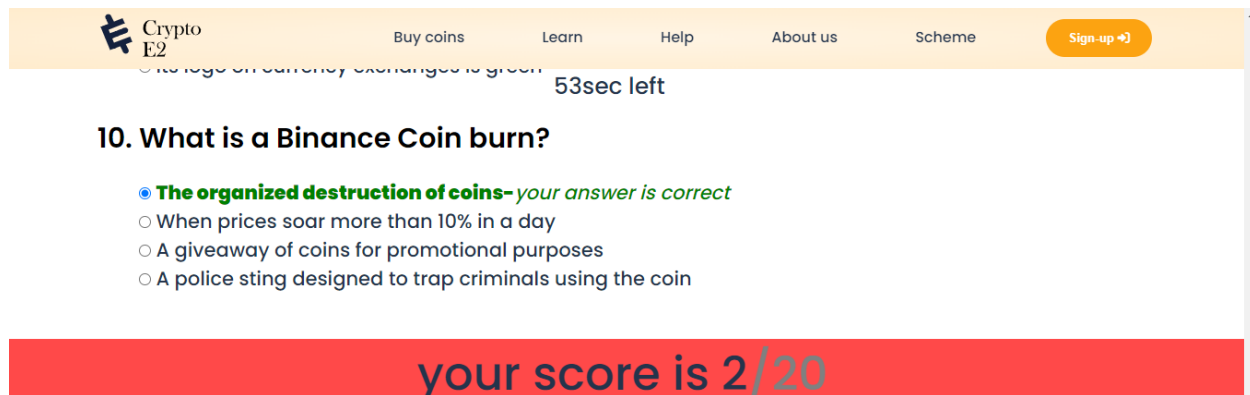

When the user clicks the submit button before the timer run out the timer will stop so the user can see how much time was taken to the completion.

```

1 clearInterval(time);

```

clearInterval function is called inside the main getValue function which is executes when only the user clicks the submit button so the timer will stop when user clicks the submit button.

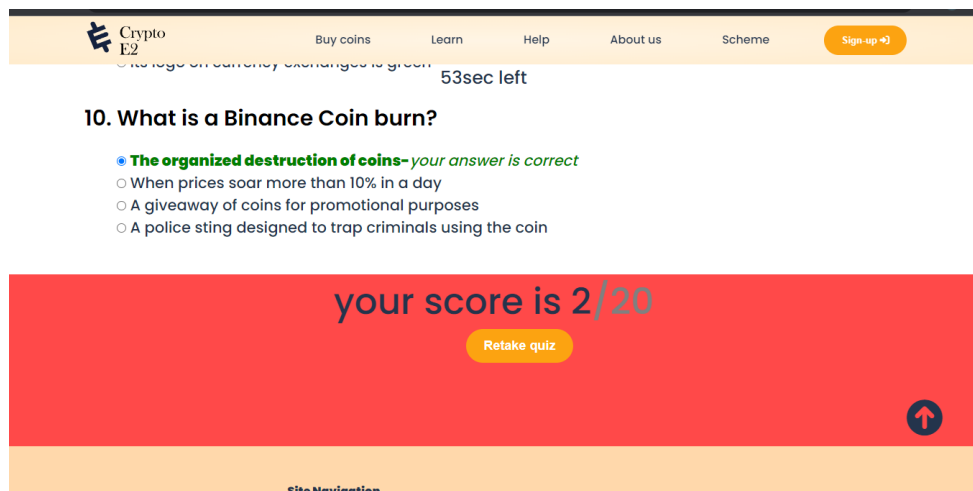

This is how the timer was stopped by the submission.

When user clicks on the submit button the button will disappear and a new **retake quiz button** will appear.

```
1 <center><button id="retake" style="display: none;"><a  
href="#">Retake quiz</a></button></center>
```

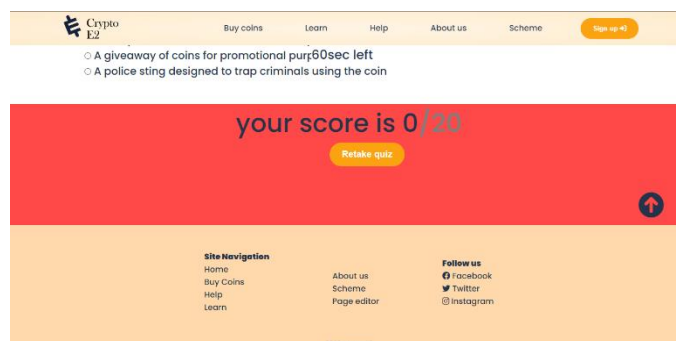

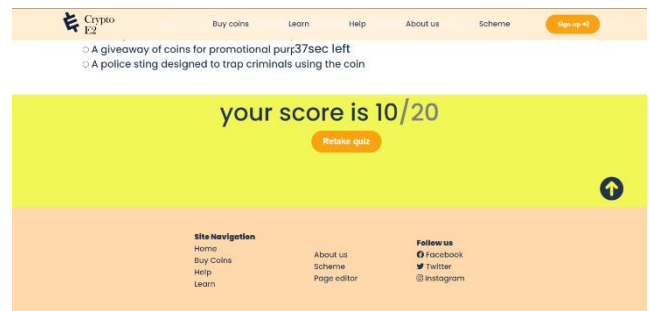

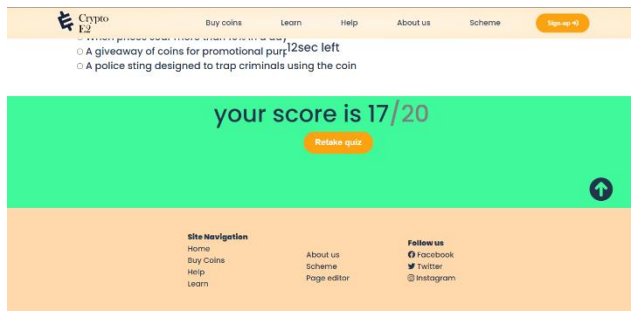

```
1 document.getElementById("retake").style.display="block";  
1 document.getElementById("sub").style.display="none";
```

This how the appearance occurs. These functions are inside the main function **getTheValues** so click on the submit button will causes these events.

The link to the quiz page is in the quiz home page.

The link on the start the quiz button opens door to the quiz page. The moment that quiz page is loaded the quiz timer will start.

The above images show how the background color changes according to the total marks of the quiz.

about us.HTML

```
1  <!--      image contianer class -->
2      <div class="imageContainer">
3          <div class="image">
4              
5              <div class="image_overlay image_overlay_blur">
6                  <div class="image_title"><h1>Student 1</h1></div>
7                  <p class="image_description">
8                      student ID:20210289<br>
9                      Chamidu Shilakshitha<br>
10                 </p>
11             </div>
12         </div>
```

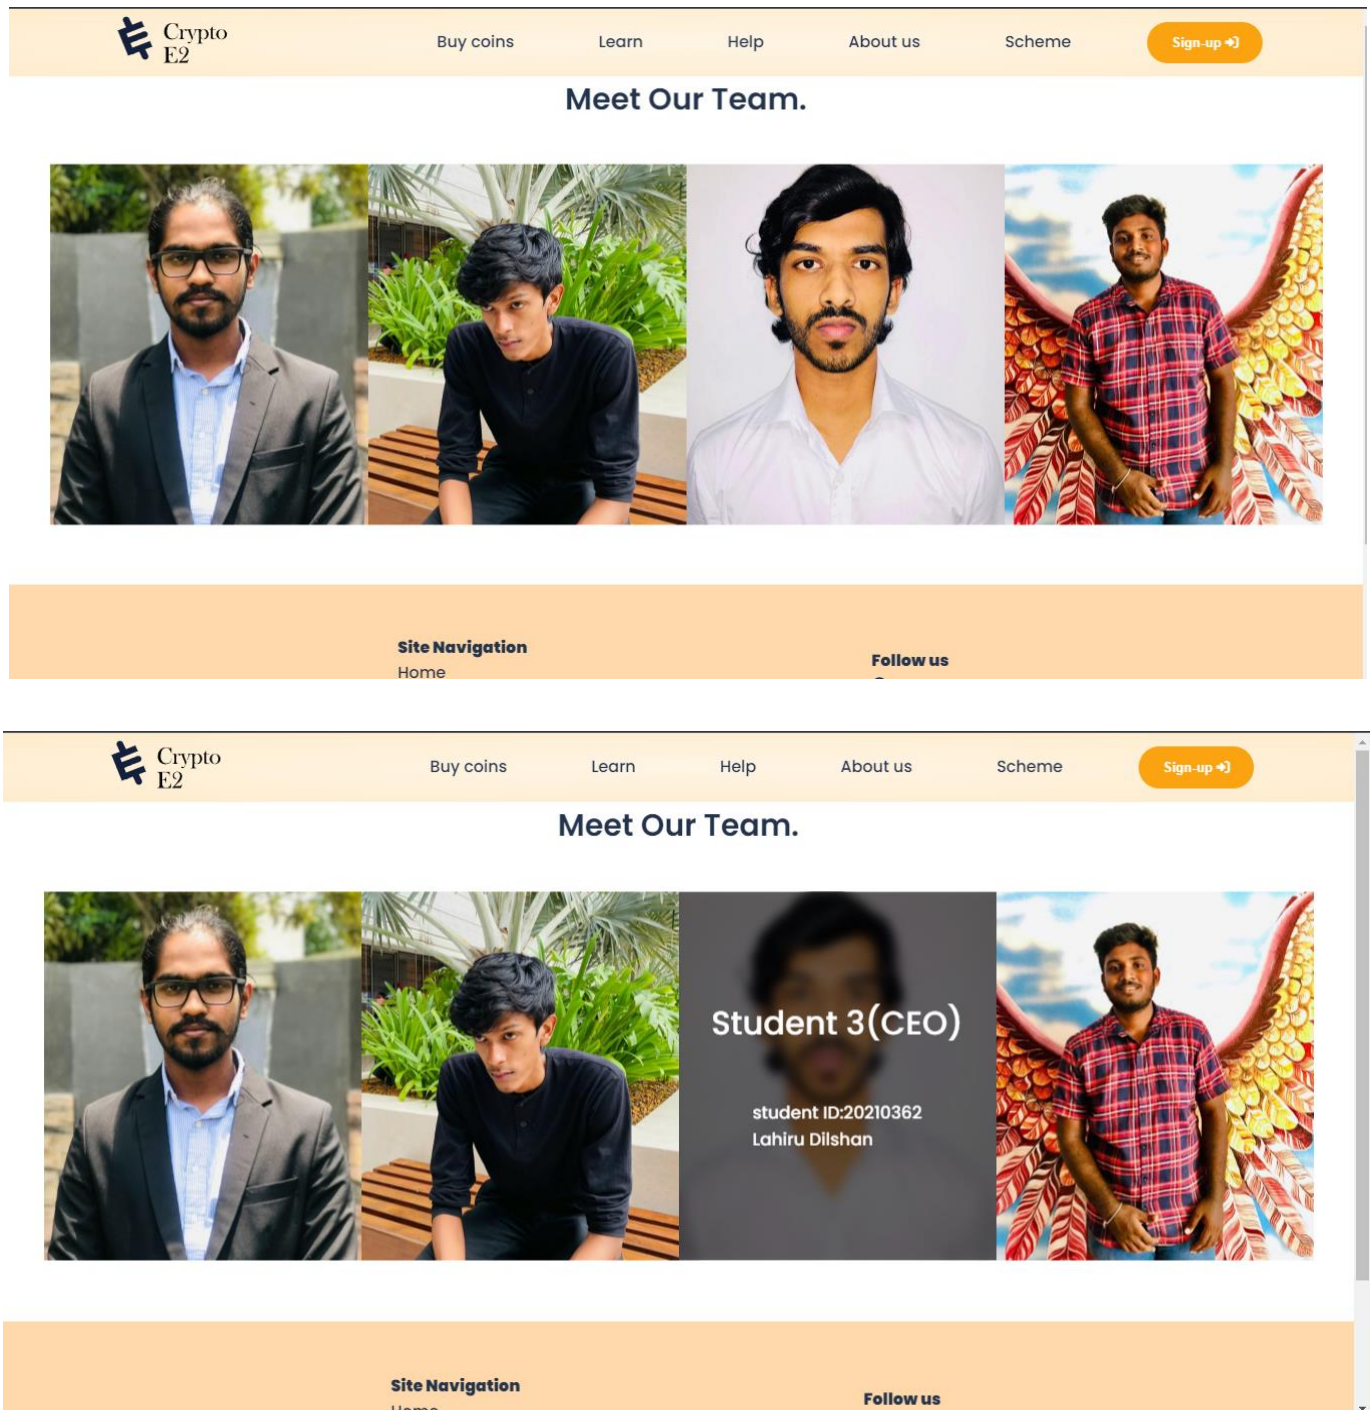

- This is how I code the about us using <p> tags and <div> tags in html.
- I used 4 columns and one line to illustrate the student pictures.
 - Ex: This is the description of the 1st student.

```
1 .image_overlay{
2     position: absolute;
3     top: 0;
4     left: 0;
5     width: 100%;
6     height: 100%;
7     background: rgba(0, 0, 0, 0.6);
8     color: white;
9     display: flex;
10    flex-direction: column;
11    align-items: center;
12    justify-content:center ;
13    opacity: 0;
14    transition: opacity 0.55s;
15 }
16 .image_overlay_blur{
17     backdrop-filter: blur(5px);
18 }
19 .image_overlay:hover{
20     opacity: 1;
21 }
22 .image_overlay > *{
23     transform: translateY(30px);
24     transition: transform 0.55s;
25 }
26 .image_overlay:hover > *{
27     transform: translateY(0);
28 }
```

This how I used the CSS to display the text behind the image when the mouse take over on it.

The image colors will blur and the student details will appear on the image.

This is how the Mouse over effect works.

Janet

✚ This crypto currency website was built using Janet rules and restrictions. Janet was created to protect Janet users from the transmission of false or invasive information, and it is essential to follow a research project that has been correctly implemented. In these instances, the organization must seek Janet's approval before beginning the operation and comprehend the responsibility for legal hurdles in order to assure compliance.

✚ Janet will not be used for the following purposes:

- Copyright infringement.
- To transmit or create unfriendly material.

✚ This “Crypto E2” web page was developed by me and my group members as a team to further improve.
